[redacted]
Thank you for your letter. My man in charge of the BPE's has been away and just returned. We see very little to bother us from your description. The one point that needs careful checking is the 78" x 78" window as one dimension of one piece of the enlarger is 78" even uncrated. I suspect it can be rigged by your people to slide through.

We will mark the shipment to the "Receiving Officer, Naval Supply Center, Pearl Harbor" and "Final Consignee: FICPAC, Ford Island, Pearl Harbor, Attn: Photographic Laboratory".

On or about 5 May, my [redacted] will come out to walk through the job, make certain the enlarger will fit, determine what special tools or packaging is required, etc. He will then return with two technicians to be on hand for the installation and training.

25X1

25X1

25X1

On the first trip, [redacted] will be accompanied by a [redacted] [redacted] from Washington. He is a "customer" type and your people, who are to use the equipment, may find it of value to talk to him about techniques, subject matter, programming, etc.

25X1

All four people will be certified as to Clearance - DOD and/or other, so that you will be able to talk freely.

Sincerely,

ORIGINAL SIGNED BY
